

Brainstorming & Idea Prioritization Template

Date	15 March 2026
Team ID	
Project Name	Smart Lender:AI/ML-Based Loan Approval Prediction System

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage

S.No	Team Member	Idea / Suggestion	Category	Group NO.
1	Gangarapu Sowmya	Develop an ML model to predict loan approval based on applicant information.	Machine Learning	1
2	Gangarapu Sowmya	Build a Flask web application for real-time loan approval prediction.	Web Development	2
3	Gangarapu Sowmya	Compare Decision Tree, Random Forest, KNN, and XGBoost algorithms to select the best model.	Model Evaluation	1
4	Gangarapu Sowmya	Design a simple and responsive user interface for applicants and bank officers.	UI/UX	2
5	Gangarapu Sowmya	Deploy the application on IBM Cloud for online accessibility.	Cloud Deployment	3
6	Gangarapu Sowmya	Generate instant prediction reports to support bank loan decisions.	Reporting	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward
With

Group No.	Final Idea Feasibility	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Train and evaluate multiple machine learning models and choose XGBoost as the final prediction model.	High	high	High	Yes
2	Develop a Flask-based web application for users to enter loan details and receive instant predictions.	High	high	High	yes
3	Deploy the application on IBM Cloud and provide prediction reports for banking professionals.	Medium	high	Medium	yes
