

Demonstration of Proposed Features

Date	15 March 2026
Team ID	
Project Name	Smart Lender :AI/ ML-Based Loan Approval Prediction System

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Applicant Data Input	Allows users to enter applicant details such as income, education, employment, loan amount, credit history, and property area.	Implemented	Yes	User-friendly Flask input form developed.
2	Loan Approval Prediction	Predicts whether a loan application is likely to be approved using the trained XGBoost model.	Implemented	Yes	Real-time prediction successfully demonstrated.
3	Multiple Model Evaluation	Compares Decision Tree, Random Forest, KNN, and XGBoost to identify the best-performing model.	Implemented	Yes	XGBoost selected based on highest testing accuracy (81.1%).
4	Model Integration with Flask	Integrates the trained machine learning model into a Flask web application	Implemented	Yes	Model loaded successfully using serialized file.

		for online predictions.			
5	Responsive Web Interface	Provides an intuitive web interface for entering applicant information and viewing prediction results.	Implemented	Yes	Interface tested successfully across browsers.
6	IBM Cloud Deployment	Deploys the Smart Lender application on IBM Cloud for public accessibility.	Implemented	Yes	Application deployed and demonstrated successfully.

Feature Implementation Summary:

Metric	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
