

Project Demo Planning

Date	15 March 2026
Team ID	
Project Name	Smart Lender :AI/ ML-Based Loan Approval Prediction System

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the Smart Lender project, explain the challenges of manual loan approval and the need for AI-based credit risk prediction.	2	Team Member 1
2	Solution Overview	Explain the project architecture, dataset, machine learning algorithms (Decision Tree, Random Forest, KNN, XGBoost), and technology stack (Python, Flask, IBM Cloud).	3	Team Member 2
3	Model Performance	Present the training process, model comparison, evaluation metrics, and justify the selection of XGBoost as the best-performing model.	3	Team Member 3
4	Live Feature Demonstration	Demonstrate entering applicant details, generating a loan approval prediction, and explain the prediction results using the deployed Flask application.	5	Team Member 4
5	Deployment & Benefits	Showcase the IBM Cloud deployment, discuss real-world use cases, advantages, and future enhancements of the Smart Lender application.	2	Team Member 1
6	Conclusion & Q&A	Summarize the project, highlight key achievements, and answer questions from evaluators and stakeholders.	3	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the need for an AI-powered loan approval prediction system and the objectives of Smart Lender.
2	Solution Overview	Describe the system architecture, machine learning models, Flask application, and IBM Cloud deployment.
3	Live Feature Demonstration	Demonstrate real-time loan prediction by entering applicant details and displaying the approval result generated by the XGBoost model.
4	Q&A Session	Respond to evaluator questions regarding dataset, model selection, accuracy, deployment, and future improvements.
